

PULL-UP CLEATS PROVIDE VERSATILITY AND GREAT LOOKS

Few things improve the appearance of a boat faster than replacing old-style block cleats with streamlined pull-up hardware that retracts into the deck when not being used. Accon 209 Series Pull-Up Cleats meet all these qualifications, providing unequalled strength and durability in a compact design with a near perfectly flush fit.

Accon Marine 209 Series Cleats are sold in 4-1/2", 6", 8" and 10" sizes to suit a wide range of boats. Each piece of quality hardware is crafted from marine-grade 316 stainless steel for exceptional durability and corrosion resistance.

These cleats are easy to install as a DIY project, with the included backing plate doubling as a convenient cut-out template. After drilling the appropriate holes, installation requires only four mounting screws. The 8" and 10" models of the Accon Pull-Up Cleat are also available in a stud mount version without visible screw holes, yielding an extra-polished look that complements luxury yacht exteriors.

All 209 Series cleats feature a sealed base with an integrated drain fitting to eliminate the need for a separate waterproofing cup. Further, these versatile models are designed to easily convert to lifting cleats by installing a bow eye connecting rod in the base of the unit.

MSRP for Accon Marine 209 Series cleats ranges from \$95.12 to \$309.03. They're backed by a 2-year warranty.
