

QUICK RELEASE DRINK HOLDERS INSTALL WHERE OTHERS WON'T

Plentiful drink holders have become expected amenities on today's boats but can be tricky to retrofit to older models, especially if the owner is uncomfortable taking a hole saw to their vessel or unsure of the precise location of hidden wiring and plumbing lines. Quick Release Drink Holders from Accon Marine utilize a simple surface mount that eliminates cut-outs altogether, allowing quick and easy installation nearly anywhere on board.

Formed from marine grade 316 stainless steel for exceptional durability and corrosion resistance, Accon Quick Release Drink Holders consist of two hardware pieces. The holders snap securely into a base that installs with two #10 screws, allowing mounting in places traditional recessed drink holders simply won't fit. A quick-release latch enables the holders to be easily removed from the base for cleaning or storage.

Accon offers both single and double Quick Release Drink Holders. They feature an 89mm opening to accommodate a wide range of can and cup sizes. An attractive, open-frame design keeps beverages secure while preventing accumulation of dirt, debris or rainwater when the boat is not being used. An optional vertical mount provides other installation choices.
