

STAINLESS PUSH POLE HOLDERS FOLD FLAT

Stowing long push poles on deck can be a challenge. With 710-Series Push Pole Holders from Accon Marine, it's simple for anglers to install premium hardware that not only secures the gear in the choppiest water but folds flat and out of the way when casting.

Built from polished marine-grade 316 stainless steel, 710-Series Push Pole Holders have durable UV-resistant glass-filled nylon hooks that pull up when needed. The 3.7" W x 5.4" L x .5" H hardware surface mounts with three #10 screws, making it simple for DIY installation.

Three 710-Series Push Pole Holders are recommended, with the center unit oriented in the opposite direction. Using the springiness of the pole itself, tension secures the device against the other holders. Sold individually, Accon Marine 710-Series Push Pole Holders cost \$83.39.

For over 30 years, the name Accon Marine has been synonymous with superior-quality marine metalwork. The company offers a broad range of flush-mount deck hardware including its popular Pop-Up® Cleat.
