

SLIM-LINE CLEATS FIT WHERE OTHERS WON'T

Sometimes, cleats can't always be positioned exactly where they're needed, especially when rails and stanchions are in the way. Slim-Line™ cleats from Accon Marine utilize a sleek, space-saving design that makes them easy to add to virtually any vessel. And because they're retractable, they maintain the streamlined lines of the boat.

Made of polished marine grade 316 stainless steel, the cleats are offered in 4-1/2", 6", 8" and 10" sizes, for lines from 1/2" to 1". The base and horn have integrated notches that allow the cleat to be easily grasped and pulled up for use. When no longer needed, the horn is simply pressed back down where it won't snag lines or stub toes.

Each cleat comes with a 1/8" thick backing plate that doubles as the cut-out template. Users need to only drill four holes and saw-cut clearance between the two center holes. Accon Marine's 304 Slim-Line Cleats have a starting price of \$94.34.
