STAINLESS RECEPTACLE COVERS SUIT MULTIPLE APPLICATIONS

Keeping electrical terminals protected from the elements is of paramount importance on yachts and commercial vessels, in boat yards and marinas, and on private docks and boathouses. Stainless Steel Flip Covers from Hubbell Marine offer weatherproof protection in a classic design that suits a variety of applications.

Crafted from heavy-duty 316 stainless steel for a lifetime of durability and corrosion resistance, these Hubbell covers are offered in self-closing or latching models for use in exposed exterior applications. The self-closing versions meet UL Type 3R standard for rain and sleet/ice resistance. For even more protection, the watertight and dust-tight latching models meet UL Type 4X standard, enabling their use in wash-down applications.

Available in either duplex or GFCI configurations, all models feature a smooth, easy-to-clean exterior design that complements high-end yacht finishes while allowing spray to run off without pooling. A neoprene gasket on the cover's underside helps seal the elements out when closed.

Hubbell Stainless Steel Flip Covers measure 3.04" H x 4.85" W with a compact depth of 0.88", making them suitable for either horizontal or vertical mounting. MSRP for the HBLSS83R self-closing duplex model and for the HBLSS263R GFCI version is \$94.85 each. The latching duplex model HBLSS84X and HBLSS264X GFCI cover each retail for \$159.
