SUPER-SIZE PROFESSIONAL FABRIC CLEANING PRODUCTS ECONOMICAL

Professional marine and RV detailers rely on quality cleaning and renovation chemicals to get a fabric restoration job done right and in the shortest amount of time. But dealing with consumer-sized products is expensive and wasteful. That's why Iosso offers both its Mold & Mildew Stain Remover and its Water Repellent in convenient large quantities. Made in the USA, the concentrated products restore fabrics, leaving them with bright, saturated colors and the same feel as when new.

Mold & Mildew Stain Remover cleans mold, mildew, leaf stain, tree sap, bird droppings, grease, oil and tough dirt from virtually every fabric surface. This biodegradable non-chlorine formula is safe on colored fabrics and solution-dyed acrylics such as Sunbrella. Applied to soiled areas, it quickly removes stains from awnings, signs, tents, boat covers, seat cushions and carpeting.

Following with Iosso Water Repellent protects against water, soil and oil. Sprayed onto clean, dry fabric, it provides invisible coverage that mimics the original material without leaving a residue, unlike silicone or solvent-based solutions that leave oily finishes and cause white fabrics to yellow. Water Repellent does not affect the breathability of the fabric.

Both products are concentrates. Not only does this make storage easier, but shipping costs are dramatically reduced. A 65 oz. pail of Iosso

-more-

Mold & Mildew Stain Remover makes 16 gallons of solution and costs \$75. A one-gallon container of Water Repellent makes five gallons of solution and runs \$170.
