## IN ONE EASY STEP, BOATS GO FROM DULL TO SPARKLING

From a distance, boats tend to appear clean as they float on the water. Owners know otherwise. Dirt, UV rays, and salt and calcium deposits combine to create a chalky, hazy film that leaves the vessel looking dull and old. With Fiberglass Reconditioner from Iosso Products, it's fast and easy to restore the boat's original color and luster, whether it's sparkling white, deep black or a rich, dark pigment.

Made in the USA, Fiberglass Reconditioner quickly removes oxidation, chalking, waterline scum, oily exhaust stains, and rust spots and drips. For boats on trailers, it's perfect for getting rid of stubborn road tar and grime. It even works on metal components such as rails, stanchions and ladders. Fiberglass Reconditioner shines to a high gloss that protects the surface for months. It's so effective that there's no need to wax the boat after applying the formula.

A true one-step product, Fiberglass Reconditioner is easy to use. Choosing a manageable working area, the paste is applied to the surface and buffed by hand or machine in an overlapping pattern. The formula doesn't contain silicone, so it won't cause problems if the boat is ever painted. A demonstration video is at [www.bit.ly/FiberglassReconditioner](http://www.bit.ly/FiberglassReconditioner).

A 1 lb. jar of Iosso Fiberglass Reconditioner will clean a 30' L boat from the waterline up and costs \$23. A 5 lb. container is \$85.45.
