FIBERGLASS REBORN WITH IOSSO

Fiberglass on boats and RVs is under constant attack from UV rays, windborne dirt, and calcium and salt deposits. Over time, their gelcoat surfaces fade and appear dull and chalky. But with Fiberglass Reconditioner from Iosso Products, it's simple to restore the surface's original deep, lustrous color while adding a protective coating—all in one easy step.

Made in the USA, Fiberglass Reconditioner removes oxidation, chalking, waterline and exhaust stains, rust spots, oil and road tar from gelcoat. The formula doesn't contain silicone, so it won't cause problems if refinishing is planned. It's equally effective on stainless steel, aluminum and chrome.

Using Iosso Fiberglass Reconditioner is easy. Applied with a brush or sponge in a manageable section, it's buffed by hand or machine in an overlapping pattern. Then, it's wiped with a soft cloth. The result is a high-gloss shine that doesn't require waxing. A concentrated formula, one pound will restore a 30' boat from the waterline up or similarly sized travel trailer. A video is at www.bit.ly/FiberglassReconditioner.

A one-pound jar of Iosso Products Fiberglass Reconditioner costs \$23. Ideal for OEMs, boatyards and marine detailers, 5 lb. and 5 gal. pails have list prices of \$85.45 and \$730, respectively. Commercial discounts are available.
