JAGUAR DEBUTS 37 WILDCAT DESIGN, WELCOMES NEW DEALER AT MIAMI

Jaguar Powerboats is synonymous with exceptionally fast, yet family-safe power catamarans. Building on this tradition, its new high-performance 37 Wildcat combines pulse-quickenning speed with the sumptuous comfort and indulgent amenities typically reserved for luxury yachts.

The 37 Wildcat draws upon decades of successful offshore racing heritage. Jaguar Powerboats company president and lead designer John Clarke is the son of legendary APBA powerboat racer Jack Clarke.

Powered by a choice of twin Mercury 300R or 450R outboards, the 37' L x 11' 6" W Wildcat is available with an interior berth layout and sponson storage. It's constructed using a fully-cored epoxy-infused layup that provides superior lamination with a higher flexural strength than other more common methods.

The 37 Wildcat design debut coincides with the announcement of Jaguar's newest dealer, East Coast Powerboats. During Miami show dates of February 16-20, power cat enthusiasts can see 37 Wildcat renderings while experiencing Jaguar's superior quality on its 43 Heritage model.

Miami-based East Coast Powerboats offers the full range of high-performance Jaguar Powerboats including the new Offshore Series of revolutionary purpose-built sportfish catamarans. Available now in 31', 34', 37' and shortly in a 43' version, these revolutionary boats offer superb build quality, strength, light weight and efficiency.

-more-

East Coast Powerboats will have easy-access slips at its Collins Ave. and 41st St. headquarters. The Jaguar 43 Heritage and the Nova 39 Center Console monohull will be in the water and available for scheduled sea trials. Nova Boats is a sister company to Jaguar Powerboats.

"We're pleased to welcome East Coast Powerboats to the Jaguar family," said John Clarke. "They understand our commitment to building safe, comfortable boats that have a top-end speed that'll take your breath away."
