JAGUAR 37OS MAKES FLIBS DEBUT

Jaguar Powerboats has enhanced its Offshore Fish series with its new 37 Offshore Series (37OS). Designed as a highly capable offshore fishing platform, the 37' L power catamaran is equally at home as a luxurious family day boat. It will be on display at the Fort Lauderdale International Boat Show, October 26–30, Red Zone docks, slips GH24 and JADU.

The 37OS showcases Jaguar's dedication to agility, efficiency and durability in a boat that defines premium build quality. A fully integrated monocoque structure, it's built of 100% Corecell™ and fully infused epoxy resin that's both lighter and stronger than traditional techniques and materials. The fully-bonded construction is so solid, the hull is backed by a lifetime warranty.

Jaguar Powerboats draws from a history of designing world-championship winning high-performance offshore race boats. With the 37OS, the company added key racing design elements that ensure a safe, dry and seaworthy ride. The hull features an aerodynamic- and hydrodynamic-stabilized forced air tunnel with an anti-stuffing bow that provides a superb ride in all sea conditions. In-tunnel lifting strakes reduce surface drag to bring the boat up to plane quickly and, combined with the light weight, enable it to run incredibly efficiently with far less power than competitors in this class. Combined with a fully-rigged

-more-

weight of only 8,500-8,600 lbs. with twin Mercury 300R or 450R outboards and a standard 410 gal. fuel tank, it has a 600-mile offshore range.

The Jaguar 37OS is a hardcore fishing machine. Its 17" draft enables access to skinny water off-limits to a deep-V hull. When the bite gets hot, the 11' 2" beam creates plenty of space to move around. Gear storage includes over 30 rod holders, expansive sub-deck dry spaces and an integrated tackle station. Standard features include dual 200 gal. insulated in-floor fish boxes and two 50 gal. livewells serviced by a triple pump integrated sea-chest; the combination makes it easy to keep bait healthy. The massive coffin box can be used for storage or as an additional fish box and the standard coffin box-cooler can be converted to an additional livewell.

When the fishing action is over, the Jaguar 37OS makes the ideal family boat. Triple helm bench seats with bolsters, a rear-facing cooler seat and a forward lounge provide plenty of space for relaxing. The center console head has a generous 5' 8" of headroom to make maneuvering within the compartment hassle-free and can be equipped with a full head unit.

Like all Jaguar Powerboats, the 37OS is semi-custom. From the propulsion package to the cup holders, the list of optional features provides owners the ability to create a boat that matches both their fishing style and unique personality. The Jaguar 37OS starts at \$485,000.
