SEA-FIRE LAUNCHES COMPANY PROFILE VIDEO

Sea-Fire Marine has launched a corporate profile video showcasing its innovative maritime fire detection and suppression systems, and insights into why it's the global leader in its market segment. The four-minute production is hosted by Ernie Ellis, principal owner and company president, and other key staff.

With high production value, the video touches lightly on the history of Sea-Fire Marine, but reaches the height of audience engagement with its detailed explanation of its technologically advanced product line. It offers rarely seen views of its engineering, manufacturing, testing and quality control areas. The video is at www.bit.ly/SeaFireVideo.

"From our drive to develop class-leading products to our focus on sustainability, we're proud of what we've accomplished in 43 years," said Ellis. "The video is informative and showcases the commitment our staff has in building the safety solutions that protect people and vessels at sea."

Since 1978, Sea-Fire Marine has manufactured a wide range of portable, pre-engineered and engineered fire systems. All products are manufactured to ISO 9001:2015 standards. It only uses clean environmentally responsible extinguishing agents that are non-toxic, non-corrosive and leave no residue.
