SEA-FIRE ADDS GERMAN DISTRIBUTOR

Sea-Fire Europe has added B.I.S. Electronics GmbH to its portfolio of European distributors. The Mühbrook, Germany-based company will market Sea-Fire's extensive line of marine fire detection and clean agent suppression solutions. Ernie Ellis, Sea-Fire Europe Ltd managing director, made the announcement.

For 20 years, ZN-Technik was a Sea-Fire distributor in Germany. Upon the retirement of ZN-Technik technical director and co-owner Rolf Paulzen, the fire suppression business was transferred to B.I.S. Löschsysteme (B.I.S. extinguishing systems), a division of B.I.S. Electronics. Co-managing directors Dirk Jantzen and Marc Jähnke are expanding the company's product portfolio to include two-year testing and 10-year maintenance of Sea-Fire detection and fire suppression systems.

"We're pleased to see Dirk and Marc continue the exceptional customer service that ZN-Technik provided," said Ellis. "Both have completed Sea-Fire's extensive training program and we have the utmost confidence in their ability to sell and service our full product line."

Located 50 miles north of Hamburg, Germany, B.I.S. Electronics manufactures computer-aided ship systems. Founded in 1994, it carries a wide range of premium onboard electronics and internal power solutions, encompassing specialized hardware and software. Its website is www.bis-electronics.com/de.
