TOOL HOLDER IS LIKE HAVING AN ONBOARD ASSISTANT

Whether on deck landing a trophy fish or in a confined space below working on a repair project, fumbling for tools is frustrating. But not with the Pro Series Tool Holder from SeaSucker. It's like having an onboard assistant. The innovative device organizes a wide range of gear and mounts exactly where it's needed: within easy reach.

Made in the USA, the Pro Series Tool Holder includes a small shelf with 17 thoughtfully placed slots and holes. Four knife slits double as screwdriver holders while five larger openings secure pliers, snips and de-hookers. Small holes are perfect for lures and hooks. A choice of white HDPE, or black or clear acrylic models, fits the styling of any boat.

The shelf of the Pro Series Tool Holder is attached to a SeaSucker 4.5" Vacuum Mount. The SeaSucker solution holds an impressive 120 lbs., unlike a common suction cup. It easily adheres to any clean, dry surface and removes without leaving a mark. This makes it a perfect transportable accessory for double duty in the galley or wherever tool organizing is needed.

Built to last, the Pro Series Tool Holder is made from UV-stabilized materials and marine-grade stainless steel. The SeaSucker Pro Series Tool Holder HDPE model costs \$99; the black or clear acrylic version is \$119.
