TEASER REEL BUILT FOR SERIOUS OFFSHORE USE

Trolling with a teaser array is a proven method of luring in billfish, but many boat owners either don't have the onboard space to dedicate to the necessary equipment or don't want to drill holes in their vessel. This is what makes the SeaSucker Teaser Reel so appealing. Built for serious offshore use, the accessory mounts temporarily to any clean, non-porous surface and holds 150' of 135 lb. test tow line to bring the trophies in to the lure.

Made in the USA, the Teaser Reel features a robust Big Jon Sports 8" Planer Reel. It's made from precision-machined aluminum that's black anodized for corrosion resistance, with an adjustable fiber disc clutch to handle excessive pressure and heat generated when deploying and retrieving arrays. The reel is mounted with stainless steel hardware onto a UV-stabilized, marine-grade polymer platform attached to a pair of 6" SeaSucker Vacuum Mounts.

Unlike a permanently-installed fixture, the SeaSucker Teaser Reel can be placed anywhere onboard. The Vacuum Mounts have a combined holding strength of 420 lbs.—more than ample to absorb the strain of trolling speeds. Unlike common industrial suction cups, their power will hold the device in place all day.

-more-

Using the Teaser Reel is simple. Once positioned where needed, the integrated power button on each Vacuum Mount is pumped several times to secure. If the orange indicator becomes visible over time, holding power renews easily with a few additional pumps. And when the trophy flags are flying, the SeaSucker Teaser Reel removes without leaving a mark. It costs \$299.

SeaSucker manufactures all its products to ISO 9001:2015 standards. The vertically-integrated company offers a wide range of fresh and saltwater boating and fishing vacuum-mounted accessories including Rod Holders, Tool Holders, Cup Holders and Cutting Tables.
