## SOAPY HANDS AND LOTS OF BOTTLES? SEASUCKER'S THERE

Whether onboard or ashore, showering requires toiletries. Having these personal items readily at hand and off the floor makes bathing easier. That's why SeaSucker introduced its new Shower Caddy. The innovative tote has plenty of space for bath essentials and mounts in seconds to any non-porous surface.

The Shower Caddy has a unique handle that unsnaps. This allows it to be moved from the top for toting to the bottom for use as a towel bar. The 9.8" L x 4.1" W shelves are slotted for fast drainage and have a slight lip to keep bottles and soaps in place. Integrated side hooks are perfect for hanging loofas. With an overall height of 13.4", the caddy can be taken apart if storage is at a premium.

Manufactured from UV-stable HDPE polymer with stainless steel hardware, the Shower Caddy is built to last. It has an integrated 4.5" SeaSucker Vacuum Mount that holds 120 lbs. and mounts virtually anywhere. And when the shower's over, it removes in seconds without leaving a mark. Available in black or white to match any décor, the SeaSucker Shower Caddy costs \$99.
