## POLYMER-BASED BOAT WAX CONTAINS NO MESSY FILLERS

Caused by fillers in the product, many waxes leave behind a white chalky residue that needs to be wiped off after buffing. Not only is this a waste of material, but it adds time to a detailing project—especially when the powder finds its way into small crevices. With Shurhold's Pro Polish Wax & Sealant, boat owners can quickly achieve a showroom-like finish without the added hassle of cleaning up filler residue.

Pro Polish Wax & Sealant is a polymer-based formula that uses only cosmetic-grade ingredients. Because it doesn't contain abrasive fillers such as talc, it applies easily and won't damage the boat's surface. Once buffed to a high sheen by hand or machine, it provides a hard, durable finish with excellent water beading properties and long-lasting protection against UV oxidation, salt, dirt, acid rain and environmental soiling. It's ideal for gelcoat, paint, clear coat, vinyl graphics, stainless steel and aluminum. A video is at [www.bit.ly/CompareWaxes](http://www.bit.ly/CompareWaxes). A 16 oz. bottle of Shurhold Pro Polish Wax & Sealant costs \$19.98; a one-gallon container is \$94.98.

Dedicated to educating boat owners, Shurhold provides key tips for boat value preservation at [www.shurhold.com](http://www.shurhold.com). Inventor of the One Handle Does It All system, Shurhold manufactures specialty care items and accessories to clean, polish and detail.
