BOATS, TOO, NEED UV PROTECTION

Experienced boat owners advise beginners to protect themselves from harmful UV rays with sunscreen and UPF clothing. They also recommend adding a defensive layer to the boat using a premium product such as Pro Polish Wax & Sealant from Shurhold. Simple to apply, this professional-grade formula provides a long-lasting shine and has UV inhibitors that shield gelcoat, paint, vinyl graphics and other surfaces against the ravages of a hot summer sun.

Pro Polish Wax & Sealant is polymer based, so it doesn't contain talc or other fillers. Not only is it easier to use, without the annoying powder produced when buffing, but because it's concentrated, it's far more cost-effective than traditional waxes. A 16-ounce bottle will cover a 35' boat.

Shurhold Pro Polish Wax & Sealant provides exceptional water beading and delivers a deep, mirror-like shine. The layer protects against UV rays, salt, acid rain and other harsh environmental contaminants.

Pro Polish Wax & Sealant is simple to use. Starting with a surface cleaned with a quality soap like Shurhold Brite Wash, a small amount of the product is dabbed onto a clean microfiber cloth or polisher bonnet and applied to the surface. Once dry, it's hand-buffed to a shine with a clean microfiber cloth. A 16 oz. bottle of Shurhold Pro Polish Wax & Sealant costs \$19.98; one gallon is \$99.98. A 32 fl. oz. bottle of Brite Wash is \$14.98.

-more-

Dedicated to educating boat owners, Shurhold provides key tips for boat value preservation at www.shurhold.com. Inventor of the One-Handle-Does-It-All-System, Shurhold is the leading manufacturer of premium detailing supplies that help clean, polish and protect vessels.
